Spring 2016

## Overview of Townsend-Winona Pavement Rehabilitation Projects

Scheduled to break ground in May, the **Townsend-Winona Pavement Rehabilitation Projects** include a mill and overlay of more than six miles of roadway between Rio Rancho Road and Interstate 40 (I-40). These projects are necessary to improve and extend the service life of this deteriorated stretch of Townsend-Winona Road. In addition to pavement rehabilitation, the projects include widened multimodal lanes, roadside drainage improvements, the installation of new guardrails and restriping of the roadway.

### County-Managed Project: Rio Rancho Road to Leupp Road

Coconino County will manage the first project that covers the area of Townsend-Winona Road between Rio Rancho Road and Leupp Road. Funded entirely by Proposition (Prop.) 403, the County's Road Maintenance Sales Tax, this project includes pavement rehabilitation, installation of widened shoulders for multimodal use, improved localized drainage along the roadway and drainage enhancements at the intersections of Townsend-Winona Road and Cosnino Road, Lumberjack Boulevard and Leupp Road. This project is scheduled for completion by early July, weather permitting.

### ADOT-Managed Project: Leupp Road to I-40

The second Townsend-Winona Pavement Rehabilitation Project will run approximately two miles from Leupp Road to I-40. Managed by the Arizona Department of Transportation (ADOT), this project is funded primarily by Prop. 403 revenues along with some funding from a federal Surface Transportation Program (STP) grant. It includes pavement rehabilitation and new widened shoulders in both directions for multimodal use. This project is scheduled for completion by late summer, weather permitting.
